

Human Interest Story (TCDO)
Behaviors Changed through our Positive Behavior

In the end of the 2005 we went to the village of Sawai Patel and when we talked about Patel about work of TCDO and its purpose so he neither appreciated nor response toward activities of TCDO. He said I cannot do any thing for you furthermore I want to clear you neither household of the family, nor children nor women nor girls will cooperate with you to start any activity by TCDO. In 2006 Patel was injured and became unconscious due to accident and was admitted in hospital, when we heard about the Patel's accident and his unconsciousness we went hospital at once for taking information about his condition and we found in a very serious condition and unconscious. I and my staff prayed the whole night during stay in the hospital for his recovery as well as arranged blood for him. In the morning he became normal and saw us, he was so pleased furthermore his family members told him that they were praying for your recovery whole night and they also arranged blood for you. He was impressed much more. And now he is playing a vital role in development activities for their villagers along with us.
